SUMMARY

With over 9 years of experience as a front-end website developer, I specialize in creating visually appealing, responsive, and high-performance websites. My expertise lies in delivering user-friendly designs that ensure seamless interactions across devices, with a strong focus on performance and SEO optimization. Skilled in HTML, CSS, JavaScript, and modern frameworks like React and Angular, I am committed to writing clean, maintainable code that drives exceptional digital experiences.

WORK EXPERIENCE

Neosoft Technologies Pvt Ltd

Feb 2017 - Present

Below are my work experiences at various client locations while working onsite for Neosoft:

Hands on client projects using HTML, CSS, JavaScript, AngularJS, Angular 14, ReactJS, Bootstrap, PrimeNG. Developed responsive UIs, integrated APIs, and collaborated with backend teams to optimize performance.

Infosys Aster

Oct 2025 - Present

- It is a set of AI-amplified marketing services, solutions, and platforms designed to accelerate the marketing value chain for B2B and B2C brands.
- Developed the frontend architecture for the Infosys Aster Global CMO AI Hub, featuring a custom-built JS slider, interactive AI-ML chatbot integration, and comprehensive Google Analytics tracking to drive data-led marketing insights for executive leadership.
- **Tech Stack** : UI component and styling in React js, RESTful API integration, RWD(responsive web design), Google Analytics,

Thomas Cook Pvt Ltd

May 2025 - Sep 2025

- Thomas Cook is a major global travel company, particularly strong in India, offering services like foreign exchange, holidays, corporate travel, and visa assistance
- End-to-End Hotel Portal: Led the full-lifecycle development of a high-traffic hotel booking portal.
- Smart Pricing Calendar: Engineered a custom calendar showing 2-month slots with dynamic high/low fare indicators to optimize user conversion.
- Dynamic UI & Logic: Built complex dynamic forms, interactive graphs, and robust filtering/sorting systems.
- Bug Reduction: Refactored the legacy flight portal, successfully reducing bugs and production issues by 70%.
- Scalability: Developed a reusable component library and managed global state using Redux Toolkit.
- **Tech Stack**: React.js, Redux Toolkit, JavaScript (ES6+), HTML5/SCSS, Chart.js, REST APIs.

Infomatic service pvt ltd

Jan 2024 - April 2025

- Designing adaptive layouts and intuitive UI elements to deliver an optimal user experience across all devices and screen sizes.
- Leveraging Angular's HttpClient and services to seamlessly connect with and manage external API data, ensuring efficient data handling and integration.
- Advanced features of Angular 14 to boost performance, enable scalable routing, and streamline form handling for more efficient applications.

Eltizam Saudi CMS

Sep 2023 - Jan 2024

- Designed and build web pages using the .NET framework, ensuring seamless user experiences and adherence to the company's design guidelines and branding standards.
- Collaborated closely with the backend development team to integrate front-end designs with backend services, ensuring efficient data flow and high performance for client-facing applications.
- Optimized web page performance and UI components, enhancing load times and responsiveness across multiple devices and browsers to improve overall user satisfaction.
